Contrary to dangerous and malicious “genocide” libel:

- Israel has never advocated, devised or entertained any plan, design or campaign, systematic or otherwise, to undermine or destroy the Palestinian people, or to act out of revenge or despair.
- Israel, the Jewish people, and Zionist movement have never entertained and are prevented both constitutionally and morally from maintaining or implementing any military, political, religious, economic or cultural campaign, or policy intended to destroy the national, ethnical, racial, and religious structure of the Palestinian people.
- Israel has never sought to prejudice the essential foundations of life of the Palestinian people, or even to question its right to exist as a people.
- Israel has not indulged in mass-murder.
- Israel does not engage in ethnic cleansing, which runs solidly against the moral, religious, and ethical codes of the Jewish people.
